THUG LIFE: HIP-HOP'S CURIOUS RELATIONSHIP WITH CRIMINAL JUSTICE

andre douglas pond cummings

I. INTRODUCTION

Hip-hop music and culture profoundly influence attitudes toward, and perceptions about, criminal justice in the United States. At base, hip-hop lyrics and their cultural accoutrements turn U.S. punishment philosophy on its head, effectively defeating the foundational purposes of crime and punishment. Prison and punishment philosophy in the United States is based on clear principles of retribution and incapacitation, where prison time for crime should serve to deter individuals from engaging in criminal behavior. In addition, the stigma that attaches to imprisonment should dissuade criminals from recidivism. Hip-hop culture
denounces crime and punishment in the United States by defying the underlying penal philosophy adopted and championed by legislators for decades. Since the inception of hip-hop as a musical genre, hip-hop artists have rhymed in a narrative format that starkly informs listeners and fans that the entire fundamental regime of prison for crime in the United States is suspect, illegitimate, and profane.

Because U.S. criminal law and punishment are profane and illegitimate to many, as hip-hop artists historically and fiercely argue, two of the primary foundational underpinnings of the criminal justice system are lost on the “hip-hop generation”: deterrence and stigma. “When incarceration is not sufficiently stigmatized, it loses its value as deterrence.”

Professor Paul Butler powerfully notes in his groundbreaking 2009 book, *Let’s Get Free: A Hip-Hop Theory of Justice*, that despite the apparent divide between socially conscious rap and gangsta rap, the hip-hop artists and culture agree profoundly on one thing: that overwhelming inequities permeate the criminal justice system in the United States. And hip-hop harshly critiques crime and punishment inequality in our country. Because, as hip-hop aggressively describes, crime and punishment in the United States is fundamentally unfair, inequitable, and biased against people of color and the poor, punishment for committing certain crimes here is viewed by the hip-hop nation as illegitimate, and imprisonment for committing

Kitwana further states: “At the core are our thoughts about family, relationships, child rearing, career, racial identity, race relations, and politics. Collectively, these views make up a complex worldview that has not been concretely defined.” *Id.; see also* Paul Butler, *Much Respect: Toward a Hip-Hop Theory of Punishment*, 56 STAN. L. suspect crimes is unaffected. Hip-hop culture has engendered in the global hip-hop generation a tradition of exposing racial inequality and social injustice, particularly within the United States.

This article will begin by exploring the global ascent of hip-hop music through an examination of how it has influenced an entire generation towards a deep distrust of the criminal justice system in the United States, to the point where imprisonment is respected, if not lauded, and deterrence has lost any realistic value for those who engage in "criminal" behavior. After examining hip-hop "lessons" through rhyme and baseline, the article will focus on the political agenda of early rap artists that included clear messages of defiance and deep disrespect for a criminal justice regime that systematically targeted young African American and urban youth. Then, this piece explores what it means for a hip-hop generation to come of age while retaining chasm-like differences from the traditional majority perspective on crime and punishment in the United States, and how this development will impact punishment and justice in this country going forward.

II. A GLOBAL FOOTPRINT

Hip-hop music and culture have "conquered" the world. Since hip-hop's humble beginnings in the streets and parks of the South Bronx in New York City, it has, in just thirty years, become a United States phenomenon and a global cultural and entertainment movement. Hip-hop artists regularly top

This global movement, however, sprang from very humble roots. Rap music and hip-hop culture was dismissed at its inception as a fad and was widely panned by critics and many in the general public as an unimportant “flash in the pan” musical movement.\(^{24}\) The public seemed content to ignore hip-hop and its accoutrements (i.e., break dancing, graffiti, deejaying, etc.) when the movement was confined to the inner city of major U.S. metropolises.\(^{25}\) Thus, when the

> Hip-hop, as the culture of rap is called, originated among young blacks in the Bronx in the 1970s. Instead of fading like many previous fads, rap’s energy has become increasingly irresistible to an international audience of teenagers and pre-teens. As in other subcultural trends that have matured into mass phenomena, rap language and style are entering older, more racially diverse, middle-class and suburban communities.

> Hip-hop words from what was once an underclass subculture are now common parlance among America’s youth...
1970s and 1980s saw the Sugar Hill Gang release *Rapper's Delight*, Afrika Bambaataa release *Planet Rock*, Kurtis Blow release *Basketball* and *If I Ruled the World*, and Whodini release *Five Minutes of Funk*, legislators and law enforcement paid little heed to this nascent movement.

However, when in the 1980s, hip-hop began creeping into the cassette players and minds of white American suburban youth—particularly with aggressive, violent, and counter culture lyrics—the general public, its legislators, and law enforcement began to take urgent notice. When Public Enemy released *It Takes a Nation of Millions to Hold Us Back* and *Fear of a Black Planet*, featuring *Don't Believe the Hype, Black Steel in the Hour of Chaos, Fight the Power, and 911 is a Joke*; when N.W.A. released *Straight Outta Compton*, featuring *Fuck Tha Police* and *Gangsta Gangsta*; when Boogie Down Productions and KRS-One released *Criminal Minded* and *By All Means Necessary*; and when Ice-T released singles *6 in the Mornin'* and *Cop Killer*, hip-hop suddenly became a lightning rod for attention and criticism.

"The mainstream always hoped it would be a fad that would die," Mr. Bambaataa said. But instead, he maintained, the distinctive hip-hop vocabulary, clothes and culture has been important in empowering and giving status to an impoverished and isolated generation of urban young people that society found threatening.

26. See id. ("Like early rock-and-roll, rap's tough sound and aggressive aesthetic can be abrasive and anti-authoritarian, raising concern among some parents and critics about hip-hop's sexual explicitness, macho swaggering and association with violence. ... 'The cultural police are always threatened by new movements, and greet them unfailingly with hysteria ... '").

The most significant response to New York hip-hop, though, came from Los Angeles, beginning in 1989 with N.W.A.'s dynamic album *Straight Outta Compton*. N.W.A. (N****z With Attitude) and former members of that group—Ice Cube, Eazy E, and producer Dr. Dre—led the way as West Coast rap grew in prominence in the early 1990s. Their graphic, frequently violent tales of real life in the inner city, as well as those of Los Angeles rappers such as Ice-T (remembered for his 1992 single *Cop Killer*) and Snoop Doggy Dogg and of East Coast counterparts such as Schoolly D, gave rise to the genre known as gangsta rap.
aggressive critiques labeled hip-hop as dangerous, irresponsible, and certain to lead listeners to violence while potentially upsetting the fragile balance of law and order in minority communities. This newfound status as controversial lightning rod came to be, not just because of the explicit political and violent counter culture messages, but because these messages were being heard and received widely by inner city youth and also by white suburban youth across the country.28 In addition, as Professor Andre Smith argues, hip-hop openly defied traditional property laws across the board, including intellectual property and municipal property codes.29 Early hip-hop’s civil disobedience took the form of house parties and park performances held without required permits or payment for electricity, unlicensed radio stations known as “pirate stations” playing hip-hop across the country, music sampling, and illegal production and distribution of records and tapes.30

Despite intense criticism and attempts to discredit and eradicate hip-hop music, including aggressive attacks launched by the FBI,31 CIA, local law enforcement across the

From the 1980s through today, hip-hop culture has grown in its power and influence. Debate has raged during these three decades as to whether hip-hop’s influence has been a positive force or a destructive mechanism, but few still believe or argue that hip-hop will fade to a mere cultural footnote.

The genuine power and robust influence of hip-hop and its generation was on clear display during the 2008 presidential election. President Barack Obama was fueled to

victory in the historic 2008 election by many various supporting constituencies; one of the most important, which drove Obama to the most powerful position in the world, was the hip-hop generation. Socially conscious rapper Talib Kweli backed and campaigned for President Obama, and referred to him as not just the first black President, but the first hip-hop President. NPR reported: “Rappers like Lil’ Wayne, Young Jeezy, Jay-Z and Nas rallied their fans behind President-elect Barack Obama’s campaign. And like their hip-hop forefathers, the kings and queens of rap preached about social justice, the economy and the power of democracy.” Dr. Cornel West, when reflecting upon the

“The challenge that Barack Obama had was really to be able to wink to the hip-hop community and say, ‘I really can’t acknowledge you in the mainstream, but understand that I’m hearing what your critique is, I’m hearing what your concerns are, and you now have a wide-open space in the so-called underground . . . to talk about why my candidacy is important,’” [Professor Mark Anthony] Neal says. “And I think many of the rappers, particularly the very visible mainstream rappers, understood that strategy, because it’s a strategy that they employ all
historic campaign waged by Barack Obama for the presidency of the United States, recently mused:

I would go as far as to suggest that there is a good chance that there wouldn’t even be an “Age of Obama” without hip-hop, given the fundamental role that young people played in galvanizing the whole campaign. I was there in Iowa when there was just a few of us. Disproportionately young, disproportionately white and when we stole away they were all listening to hip-hop. And I am not talking about just Eminem. . . . Hip-hop doing what? Opening young people to the humanity of other young black people whose conditions have been overlooked.40

At bottom, as hip-hop has become the voice of a generation, and recognizing the sizeable global footprint that hip-hop has created, two things seem clear: first, as the hip-hop nation emerges, some of its members will become leaders, including legislators, educators, lawyers, scholars, and philosophers; and second, these leaders and educators will bring the images, lessons, and stark critiques that accompany all authentic members of this generation into their leadership roles. Because hip-hop is deeply impacting an emerging generation of leaders and scholars, society should pay very close attention to the messages and lessons that hip-hop has taught and continues to teach its generation.

Particular awareness should be paid to the one lesson upon which all of hip-hop, both “gangsta” and “socially conscious,” seems to agree: that the United States system of crime and punishment is inequitable, unfairly administered, and purposely aimed to disempower people of color and the voiceless.

III. "THE EDUCATIONAL LEVEL I'M GIVING THE PEOPLE"\textsuperscript{41}

While many different iterations exist in the world of hip-hop music and culture, a common division often cited is that between socially conscious hip-hop and the hip-hop that focuses on violence, misogyny, and gaining riches ("bling" or "gangsta rap"), which permeates much of what is currently released for public consumption.\textsuperscript{42} While this differentiation may be too simplistic, many commentators agree that some type of divide exists in hip-hop between that which is positive and uplifts the black and inner city community (socially conscious rap) and that which is negative and serves to degrade women, perpetuate violence, maintain stereotypes, and injure the black and inner city community (bling or gangsta rap).\textsuperscript{43} One reason that this characterization is too simple is that many "gangsta" rappers release records that could be characterized as positive and uplifting, while many "socially conscious" rappers release music that could be characterized as misogynistic or violent.\textsuperscript{44} As Professor Pamela Bridgewater has noted, hip-hop refuses to apologize

Rutherford states that a distinction exists between socially conscious hip-hop artists and more negative hip-hop, and opines without citing support:

> There are plenty of artists recording Hip-Hop music today who do not espouse violence: Common, Talib Kweli and the Roots, to name a few. But the level of attention, exposure, and airplay that these artists receive pales in comparison to their platinum-selling counterparts, all of whom choose to infuse their albums in varying degrees, with anti-social content.

for the many and often complex inconsistencies it portrays.\textsuperscript{45}

Still, very early on, both socially conscious hip-hop artists and gangsta rappers began to understand the power and influence they could wield in “molding the destinies” of hip-hop’s fans and adherents. In the 1980s, “socially conscious” rap stars KRS-One and Public Enemy began articulating clear messages to the public/fans, with albums like \textit{Edutainment}\textsuperscript{46} and songs like \textit{Fight the Power}.\textsuperscript{47} Hip-hop stars became keenly aware of their burgeoning influence and many took it upon themselves to educate the hip-hop generation.

Hip-hop legend Tupac Shakur recognized this influence when he boldly stated: “I guarantee that I will spark the brain that will change the world.”\textsuperscript{48} Gangsta rap pioneer Ice-T described this flourishing influence in particularly savvy terms when responding to critics of his stark realist hip-hop lyrics by boldly proclaiming that the hip-hop stars of the 1980s and 1990s would truly influence a nation:

They are not really after me for that, [law enforcement and critics are] after me because of the educational level I’m giving the people. And I’m telling them, I am giving them the guts to say, “Fuck em.” See, this is what scares them. They are scared of one brother yelling out “the system can ‘kiss my ass.’” This could cause a problem.

They are also afraid of the fact that kids that go to law schools, Harvard and all these, are listening to my album, think its dope and these kids are the next ones that are going to be sitting on the Supreme Court. Next, what you are going to have in five years is that the Supreme Court is going to be wearing Too Short, Ice-T, Yo-Yo, Ice Cube t-shirts. The country will be fucked, as far as they’re

concerned. I think it will be a great place.\textsuperscript{49}

Like Ice-T, Professor Smith not only recognizes the influence that hip-hop artists have in educating America's hip-hop generation, he also opines that these artists have influenced the perspectives of listeners across the world:

For many of the world's poor and non-propertied, the emergence of hip-hop culture has represented a powerful movement against the propertied and the social order maintaining their wealth. Surely, Public Enemy's song "Fight the Power" promoted hip-hop globally as an art form capable and worthy of adoption by those struggling for economic or social justice.\ldots

\ldots[I]t is not surprising that, for example, young Palestinian and Brazilian youths have embraced hip-hop as their way of expressing dissatisfaction with their social order, as do rebellious suburban teenagers in the U.S.\textsuperscript{50}

As hip-hop has roared to an ever increasing apex in connection with its power, influence, and global impact, and as hip-hop artists recognize this influence and impact, it would behoove the traditional majority to sit up and recognize what this global genre is saying about crime, punishment, inequality, and imprisonment in the United States and across the world.

IV. WHAT HIP-HOP TEACHES ABOUT CRIME, PUNISHMENT, AND IMPRISONMENT

Recently, hip-hop superstar Lil' Wayne delivered a rap message that should motivate the traditional majority to "sit up and recognize." Lil' Wayne released the song "Don't Get It" in 2008 which included the following critique of the U.S. system of punishment:

I'm just a soul whose intentions are good
Oh lord please don't let me be misunderstood.

I was watching T.V. the other day right
Got this white guy up there talking about black guys
Talking about how young black guys are targeted
Targeted by who? America
You see one in every 100 Americans are locked up

\textsuperscript{49} See id. (featuring an interview with Ice-T).
\textsuperscript{50} See Smith, supra note 12, at 60.
One in every 9 black Americans are locked up
And see what the white guy was trying to stress was that
The money we spend on sending a mothafucka to jail
A young mothafucka to jail
Would be less to send his or her young ass to college
See, and another thing the white guy was stressing was that
Our jails are populated with drug dealers, you know
crack/cocaine stuff like that
Meaning due to the laws we have on crack/cocaine and regular cocaine
Police are only, I don't want to say only right, but shit
Only logic by riding around in the hood all day
And not in the suburbs
Because crack cocaine is mostly found in the hood
And you know the other thing is mostly found in . . . you know where I'm going
But why bring a mothafucka to jail if it's not gon' stand up in court
Cause, this drug ain't that drug, you know level 3, level 4 drug, shit like that
I guess it's all a misunderstanding
I sit back and think, you know us young mothafuckas you know that 1 in 9
We probably only selling the crack cocaine because we in the hood
And it's not like in the suburbs, we don't have what you have
Why? I really don't wanna know the answer
I guess we just misunderstood, hunh
You know we don't have room in the jails now for the real mothafuckas, the real criminals
Sex offenders, rapists, serial killers
Don't get scared, don't get scared

Thus, in 2008, millions of Lil' Wayne fans either learned or were reminded of both the excruciatingly unfair crack versus cocaine sentencing laws in the United States and of the inequitable prison sentencing numbers that continue to destroy the inner city. For example, when Lil' Wayne rhymes about "1 in 100 Americans being locked up" but "1 in 9 black Americans being locked up," he reminds hip-hop aficionados and teaches amateur hip-hop listeners about the
incomprehensible incarceration bias against African Americans in the United States.\textsuperscript{52} When Lil' Wayne raps that it is "only logic" for police to infiltrate "the hood" daily based on the cocaine versus crack sentencing disparity, he reminds the hip-hop enlightened and teaches budding hip-hop fans that the United States Congress has, for twenty years, perpetuated a racist and biased sentencing disparity between drug users and dealers that traffic cocaine (typically white suburban users—punished lightly) versus crack cocaine (typically minority inner city users—punished severely).\textsuperscript{53}

Lil' Wayne in \textit{Don't Get It} simply propagates the hip-hop tradition of using lyric and wide audience appeal to educate the hip-hop generation. Harsh critique of the inequities in the criminal justice system and police brutality was on early display in N.W.A's 1989 \textit{Fuck Tha Police}:

\begin{verbatim}
F*ck the police
Comin straight from the underground
Young n**a got it bad cuz I'm brown
And not the other color so police think
They have the authority to kill a minority

F*ck that shit, cuz I ain't tha one
For a punk mothafucka with a badge and a gun
To be beatin on, and thrown in jail
We can go toe to toe in the middle of a cell

F*ckin' with me cuz I'm a teenager
With a little bit of gold and a pager
Searchin my car, lookin for the product
Thinkin every n**a is sellin narcotics

You'd rather see me in the pen
Than me and Lorenzo rollin' in the Benzo

And on the other hand, without a gun they can't get none
But don't let it be a black and white one
Cuz they'll slam ya down to the street top
Black police showin' out for the white cop
\end{verbatim}

\textsuperscript{52} See infra note 63 and accompanying text.

\textsuperscript{53} See infra notes 64, 66 and accompanying text.
Ice Cube will swarm
On any mothafucka in a blue uniform
Just cuz I'm from the CPT, punk police are afraid of me,
huh
A young n***a on the warpath
And when I'm finished, it's gonna be a bloodbath
Of cops dyin' in L.A.
Yo, Dre, I got something to say

As in 2008 with Lil' Wayne and Don't Get It, when N.W.A. released the furiously defiant Fuck Tha Police in 1989, a generation of young people were instructed that law enforcement routinely targets minority youth expecting most to be involved in drug trafficking and that the criminal justice system often prefers that young African American youth be installed in jails and prisons, whether guilty of crime or not. At that time, the 1980s, this exposed notion of targeting, profiling, and preferred imprisonment of inner city youth for "soft crime," and the clarion call for defiance in response to this unjust system, was audacious and stunning in its raw, starkly realized exposé. Law enforcement, together with the traditional majority, reacted swiftly in an attempt to stifle and silence this critique. The FBI famously penned a

A. Hip-Hop Lessons

Beginning in the 1980s with Public Enemy, KRS-One,
N.W.A., and Ice-T among many others, hip-hop artists began
describing, in stark rhymes and narratives, a United States
criminal justice system that was inequitable and unfair, a
system that targets and profiles African-Americans and inner
city youth, and the descriptions by those artists became, in
Chuck D’s words, “the Black CNN.”  

As discussed in Part III, these rap artists knew that they were the Black CNN and
were influencing and molding a generation. Hip-hop’s
musical tradition is to be, in many instances, black America’s
first response to current inequities and discriminations. As
Professor Mark Anthony Neal stated: “Whether it’s Katrina
three years ago, the L.A. riots in 1992, Jesse Jackson’s run
[in] 1984, you know, hip-hop was seen as black America’s first
response.”

always surrounded Public Enemy in the 1990s, reported:

The rap group Public Enemy has a knack for shooting itself in the
foot. Its response to a controversy last summer over anti-Semitic
statements by its “minister of information” has now appeared in lyrics
from its new single, “Welcome to the Terrordome,” that also seem to
cross the line into anti-Semitism.

... 

Public Enemy has been in rap’s musical and political vanguard
since 1987, when the group revolutionized the sound of rap with its
dense, jarring, propulsive sonic collages. The booming voice of Carlton
(Chuck D.) Ridenhour quickly became synonymous with a commitment
to militant black self-determination.

In *Much Respect*, Professor Butler writes:

At the same time that an art form created by African American and Latino men dominates popular culture, African American and Latino men dominate American prisons. Unsurprisingly then, justice—especially criminal justice—has been a preoccupation of the hip-hop nation. The culture contains a strong descriptive and normative analysis of punishment by the people who know it best.\(^6\)

Thus, a movement that was beginning to dominate a generation, combined with artists who understood the potential dominance and who lived on the front lines of the crime and punishment system in the United States, came together in a perfect storm of platform, audience, and defiance. The hip-hop generation was going to learn, in no uncertain terms, about the inequities, injustices, and discriminations in the U.S. criminal justice system.

Hip-hop exposes the current punishment regime as profoundly unfair. It demonstrates this view by, if not glorifying law breakers, at least not viewing all criminals with disgust which the law seeks to attach to them. Hip-hop points out the incoherence of the law’s construct of crime, and it attacks the legitimacy of the system. Its message has the potential to transform justice in the United States.\(^6\)

In the 1980s and 1990s, hip-hop stars described, to their eager audiences, including millions of suburban white youths, the inequities in criminal law and punishment, including (a) the specific targeting of inner city communities, revealed by the now well-known massive prison population disparity (nearly sixty percent of men imprisoned for drug offenses are African American, while only twelve percent of the total U.S. population is black),\(^6\) (b) the egregiously unfair imprisonment of inner city crack dealers versus suburban

In hearing and feeling these lessons dropped by hip-hop educators, an entire hip-hop nation learned and continues to learn a much different system of criminal justice than that what was taught to them in grade school, high school, college, and graduate school, including law school. More than any other lesson learned, perhaps the most striking is that the entire foundational principle of prison for crime in the United States is suspect, illegitimate, and profane.

B. United States Philosophy of Punishment and Imprisonment

While varying philosophical underpinnings for punishment and imprisonment are debated worldwide, the prevailing view of imprisonment in the United States is referred to as the "conservative approach" to imprisonment. This "conservatism: deterrence and incapacitation" prizes the philosophy that casting criminals into prison will deter individuals from acting in ways that lead to prison. "Prison life should be uncomfortable—even painful—and rational people will be deterred from committing crime to avoid being sent there again." While some attempts have been made throughout U.S. history to use imprisonment for purposes of rehabilitation, the prevailing view in this country is that prison will deter criminals and the stigma of having been imprisoned will inspire those inclined to crime to avoid criminal behavior and deter them from returning. Deterrence and stigma then serve, in many ways, as the foundational principles for imprisonment in the United States.

Perhaps one of the greatest weaknesses in the current regime of U.S. crime and punishment, and most criticized, is that incarceration and retributivism is fundamentally based on a system that has always been developed from the top
down. More plainly stated, the U.S. system of criminal justice has been developed and refined, from inception, by the privileged and the powerful, those individuals who have little to no experience or firsthand knowledge of poverty, despair, voicelessness, and victimization. Hip-hop argues, even philosophizes, about a system of punishment that can and should be developed from the bottom-up.

Thousands of hip-hop songs consider crime and punishment. These voices are worth listening to—they evaluate criminal justice from the bottom up. . . . We might punish better if the ghetto philosophers and the classic philosophers met. They address many of the same issues in punishment, including causation, harm, responsibility, excuse, and justification.

Speaking in broad brush strokes, those that favor imprisonment as a means of deterrent punishment and retribution are those that have inhabited the rare air of the privileged. Those that favor rehabilitation as a means of punishment and imprisonment are typically those who know firsthand, that life is messy, seedy, and rarely as perfect as it is for the privileged.

Because of the top-down approach of crime and punishment in the United States, our prisons are literally teeming with minority convicts who are incarcerated for soft drug crimes, will be imprisoned for decades because of skewed sentencing guidelines, and will share the same cells inhabited by murderers, rapists, pedophiles, and hardened career criminals.

This top-down approach of determining which activity will count as criminal and which will not (i.e., marijuana sale and use—a crime; alcohol and tobacco sale and use—not a crime), of determining which crimes will be severely punished and which will not (i.e., peddling soft drugs and crack—harshly punished; bankrupting corporations and destroying capital markets—not harshly punished, but in fact, bailed out with taxpayers money), and favoring harsh imprisonment with little directed rehabilitative effort, has been recognized in hip-hop music and culture as illegitimate and profane.

Instead of working on the outside to repay their victims and support their families, many non-dangerous offenders are idle in prison... Prisons are, indeed, graduate schools of crime.”).
C. The Curious Relationship Between Hip-Hop and Imprisonment

As described above, to many in the hip-hop generation, U.S. criminal law is profane and illegitimate, as forcefully argued by artists from hip-hop's birth in the Bronx through today.\textsuperscript{96} As such, the goals of deterrence, stigma, and incarceration are primarily lost on the hip-hop nation. Many in the hip-hop generation recognize that imprisonment, arrest, and charges of criminal activity are little more than politically motivated, incoherent, inefficient, and unworthy directives. Because imprisonment for various crimes is political, incoherent, inefficient, and unworthy, much of the U.S. crime and punishment regime is given no respect by hip-hop culture. Therefore, for many members of the hip-hop nation, prison has come to be viewed as a “rite of passage” and a legitimating activity in the hip-hop hustle.

Over and over, hip-hop artists “shout out” their brothers and sisters in prison, recognizing them as human and worthy of respect and attention. Most know that, in the eyes of those that matter to them, the “brother behind bars” is probably illegitimately incarcerated. Jay Z recognizes this in “A Ballad For A Fallen Soldier”:

\begin{quote}
Shout to my n****s that's locked up in jail
P.O.W's that still in the war for real
\ldots
But if he's locked in the penitentiary, send him some energy
They all winners to me\textsuperscript{97}
\end{quote}

Ludacris recognizes this in “Do Your Time”:

\begin{quote}
If you doin' 25 to life, stay up homie
I got your money on ice, so stay up homie
If you locked in the box keep makin' it through
Do your time, do your time, don't let your time do you\textsuperscript{98}

T.I. recognizes this in “You Ain’t Missin’ Nothin’”:

The time’ll do itself, all you gotta do is show up
Keep layin’ down wakin’ up
And thankin’ the Lord
And ‘fore you know it they gonna open the doors

I know the times seem long
Just try and keep strong
Put on your headphones and rewind this song
Remember you ain’t missin’ nothin’ homes
I promise you ain’t missin’ nothin’ homes

Many in the hip-hop generation believe, by and large, that the United States has abdicated its responsibility to the poor and those in the ‘hood, as evidenced by poverty, lack of opportunity, and joblessness. So much so, that the stigma of being imprisioned for theft, drug crimes, or some violence is simply absent. “Breaking the law is seen as a form of rebelling against the oppressive status quo . . . . Rappers who brag about doing time are like old soldiers who boast of war wounds.” A commentator further writes: “If imprisonment is no longer viewed primarily as a substantial loss of one’s freedom and liberty to be avoided, but rather a rite of passage resulting in increased social respect, can we really expect individuals to fear or respect the law?” As imprisonment in the United States is viewed by many as a rite of passage and the prisoner is viewed with respect and admiration, and as the value of deterrence is diluted and stigma is lost on the hip-hop generation, should not then a new American theory of crime, punishment, and imprisonment be considered and implemented?

Crime and punishment in the United States is predicated on deterrence, incapacitation, and stigmatization, and the

hip-hop generation recognizes none as truly legitimate. The system of crime and punishment in the United States has lost its way. The criminal justice system is disrespected and dismissed by a wide swath of American citizens. This should be a chilling and sobering thought to legislators, prosecutors, judges, and lawmakers.  

This is not to say that hip-hop ignores law-breaking or does not believe in some type of retributive consequence for engaging in immoral crimes. It recognizes the need for imprisonment for legitimate crime and seeks community retribution for crimes like murder, rape, child abuse, and so forth. But as for the illegitimate or inequitable punishment for crimes, including drug crimes and sentencing, the three-strikes laws, and the loitering and petty theft crimes, these are all viewed as skewed against people of color and imprisonment for these crimes are ignored, dismissed as illegitimate, and disavowed. Hip-hop culture recognizes that in many instances, crime is justified by lack of opportunity.  

As Professor Butler cogently recognizes: “Hip-hop culture emphasizes the role of environment in determining conduct, whereas classic retributivist theory focuses on individual choice. In essence, hip-hop culture discounts responsibility when criminal conduct has been shaped by a substandard environment.”  

The question I am most interested in seeing answered is this: will the emerging leaders of the hip-hop generation—including lawyers, scholars, legislators, economists, preachers, laborers, and teachers radically change the broken system of crime, imprisonment, and punishment in the United States?  

One scholar has started on this path already by suggesting six ways that hip-hop can assist in producing legitimate standards of crime and punishment in the United States, a regime that respects the individual, protects the community, and imprisons only those from whom society needs protection. For the hip-hop generation legislator or policy maker, Professor Butler, from a hip-hop perspective, offers a starting place for a more humane, more bottom-up

approach to crime and punishment in the United States:

First, the purpose of punishment should be retribution. Second, punishment should be limited (but not determined) by utilitarian concerns, especially the effect of punishment on people other than the lawbreaker. Third, punishment should be designed to "catch" the harm caused by rich people more than poor people. Fourth, people probably should not be punished for using or selling intoxicants. Fifth, punishment should be imposed only by people within a community, not outsiders. Sixth, prison should be used sparingly as an instrument of punishment.\(^{107}\)

Will those emerging leaders from within the hip-hop nation respond to this call?

**V. CONCLUSION**

Hip-hop teaches that the U.S. system of crime and punishment is inequitable, and does so primarily by exposing, in stark lyric and behavior, that the poor are punished more harshly than the rich, and that drug offenders are punished more harshly than white collar criminals. An amazing chasm exists between the hip-hop generation and the traditional majority perspectives. Hip-hop asks who the true criminals are: young inner city youth selling drugs with no prospects for work, petty thieves stealing to eat, or the 2008 corporate executives at AIG, Lehman Brothers, Countrywide, and Bear Stearns, who recklessly torpedoed the U.S. economy and, rather than facing jail, received government bailout money exceeding $800 billion dollars.\(^{108}\) Hip-hop adjudges this system of prioritizing crime in this way as obscene.

Respected scholars are arguing today that hip-hop offers a legitimate alternative theory of justice,\(^{109}\) that hip-hop's bold trespass into traditional copyright and property law is a form of civil disobedience,\(^{110}\) that hip-hop has influenced a generation of law students and young lawyers to proactively

seek radical means of justice,\textsuperscript{111} that hip-hop comfortably debates and exposes the "dark side" of American society and inequality,\textsuperscript{112} that gangsta rappers stake an important place in the black public sphere while still providing seeds of political expression amidst the violence and misogyny,\textsuperscript{113} that criminal prosecution of mix-tape DJs is an improper use of police power in an ever changing copyright dynamic,\textsuperscript{114} that hip-hop did not create the violence and misogyny rampant within it but merely contextualized it for the black community,\textsuperscript{115} and that hip-hop profoundly influences political discourse.\textsuperscript{116} It then seems time for U.S. legislators and policy makers to reexamine the fundamental underpinnings of crime and punishment in the United States. It simply does not work for the hip-hop generation.

Hip-hop erases the stigma of imprisonment. Hip-hop refuses to acknowledge the deterrent power of the U.S. prison system as it recognizes the many illegitimate and profane uses of the law to subjugate people of color and punish the poor and powerless, while ignoring the criminal behavior of the wealthy and privileged. While hip-hop does not say much about actual life in prison, it certainly respects the imprisoned and welcomes the convicted back into society openly.

If in fact, American society is no longer fine with its prisons overflowing with petty criminals and grossly disproportionate imprisonment of minorities, and if American citizens are no longer fine with spending billions of dollars on
